

2536 Diamond

2551 Big Diamond

2552 Trapeze

2553 Sequins

HOLZ IN FORM

Innovations 2015

2536 Diamond

“Diamond” – scalene triangles, apparently random combinations that create a perfect play of light and shadow. This effect is highlighted by the structure’s high precision. In the lacquered version emerges an effect of depth that is never intrusive. The texture of real wood veneer does not interfere with this effect, but creates an exceptional surface that is new and unique.

Dimensions:
Thickness:
Surfaces:

3135 x 1270 mm
18,5 mm

Oak nature real wood veneer
Oak smoked real wood veneer
Oak grey real wood veneer
Lacquerable foil, raw, unlacquered

2551 Big Diamond

The structure “Diamond” will be extended by a XXL-version called “Big Diamond”. Even, bigger, more striking, and even more depth and more play of light and shadow. It is available in real wood veneer, lacquerable foil, or real metal coating and especially fits for large-scale wall covering or panel. “Big Diamond” is also available as wall panel with repeating pattern and can be combined horizontally as well as vertically. For more details, see our special brochure “Big Diamond – Wall Panel”.

Dimensions:
Thickness:
Surfaces:

2450 x 1050mm
28mm

Oak nature real wood veneer
Oak smoked real wood veneer
Oak grey real wood veneer
Lacquerable foil, raw, unlacquered

2552 Trapeze

“Trapeze” consistent, linear, geometrical exact and with a smooth look and feel. Its directional orientation underlines the presence of objects in a very subtle way.

Dimensions: 3135 x 1270mm, 1270 x 3135mm, 2450 x 1050mm, 1050 x 2450mm
 Thickness: 18,5mm
 Surfaces: Alpi veneer ebony maro, Alpi veneer light oak, Bog oak real wood veneer , Lacquerable foil, raw, unlacquered
 (Other finishes upon request)

2553 Sequins

The structure “Sequins” extends the product line of modern structures. It creates with its fineness and neutral direction a unique look by using reflections and refraction of light. Both structures are predestinated for lacquered surfaces and real metal coatings.

Dimensions: 2450 x 1050mm
 Thickness: 18,5mm
 Surfaces: Lacquerable foil, raw, unlacquered

Detail of a reception counter, body in "Trapeze" with mitered corner.
Golden frame in structure "Sequins", in real metal gold coating, with indirect lighting.
