

More Inspiration

Natural surfaces are right on trend and lend a building an individual air. Wood Design is one such example: Hardly distinguishable from real wood, it offers all the benefits of a Reynobond® aluminium composite panel or Reynolux® aluminium sheet. With a number of attractive surfaces they offer a whole range of designs to give you unlimited scope.

Our innovative surfaces are forever setting new market standards – take, for example, our “Effects”, “Natural Finish” or our extensive range of metallic designs. All colours on the RAL colour chart are of course available. And what’s more: To achieve a harmonised look, we can also lacquer the screws and rivets in your chosen surface colour.

More Protection

All Reynobond® and Reynolux® designs are coated with DURAGLOSS® and adapted to the relevant requirements, including special solutions for specific additional uses.

- **Anti-graffiti:** Innovative protection against the most well-known spray paints, which also facilitates easy removal of graffiti.
- **Scratch-resistant:** This 3-layer coating guarantees that the surface is particularly immune to scratches and also enhances resistance to wear and tear.
- **Easy-clean:** The enhanced hydrophilic effect of this coating offers ideal protection against environmental conditions and UV rays. As a result, the surface is much less susceptible to dirt, which can be easily removed with water and detergent.

More System

We not only provide you with the most innovative and creative range of aluminium composite panels. Our Reynolux® range also offers you stove-enameled aluminium sheeting, which is lighter than other materials but still weatherproof and dimensionally stable. The combination of Reynobond® and Reynolux® gives your projects a completely new dimension, since the two products complement each other perfectly. Manufactured at the same coil-coating plant, their colours are always certain to be identical. Hence you can clad a facade with harmonious designs but different materials, thereby gaining benefits in terms of both design and cost.

Naturally we have all the necessary assembly systems to hand for your particular facade.

Choose from four Coating Systems

You can choose between four coating systems with Reynobond® and Reynolux®:

- **DURAGLOSS®** was developed by us as a high-performance coating based on polymer resin. It offers serious resistance to wear and tear, salt, moisture, and UV rays. DURAGLOSS® comes in gloss levels of 3 % to 80 % (by comparison: only 20 % to 30 % with PVDF). Many of the colours are also available with surfaces in a powder-coated look. Your technical advisor can help you with questions on which gloss levels can be used with certain colours.
- **PVDF 70/30 coating:** This coating is considered the standard for high-performance coatings in the construction industry, mainly on account of its durability. It is ideally suited to aggressive environments and extreme climatic conditions.
- **Polyamide coating:** All the benefits of polyester plus outstanding scratch resistance.
- **Polyester coating:** This coating is very flexible and highly resistant to weather conditions. An extensive range of colours is available.

The colours shown here are just some of the many options we have to offer. We can also gladly produce individual colours upon request to match your specifications. Due to the printing process, the colours depicted here may deviate from the actual colours available.

Reynobond® and Reynolux® can be combined in your projects without any colour deviation. All information was correct at the time of publication. The company reserves the right to make changes and additions. We accept no liability for typographical errors. Please refer to the delivery program for further information on standard colours, gloss levels, minimum orders and delivery times.
