NATURAL SURFACES ON HIGH PRESSURE LAMINATES

WILDSPITZE – Alpine Hay – WSP0000090HPL 

## Wildspitze

**THE HIGHEST MOUNTAIN IN TYROL TOWERS AT A MAJESTIC 3,770 m  
OVER THE IMPRESSIVE ALPINE LANDSCAPE.**

The Wildspitze's many ridges are home to Alpine huts and meadows, many of which are still traditionally managed. More often than not, farmers still tend to the land without the use of machines because many areas can only be reached on foot. Bringing the fragrance of Alpine hay from the foot of the Wildspitze into your

home was only achieved after years of intensive research and trials until the breakthrough in 2012: This valuable natural material is carefully pressed to retain the original feel, colour and natural scent. A natural surface was the result: WILDSPITZE.

# Organoid® Acoustics

**NATURAL SURFACES ON ACOUSTIC PRODUCTS**

ON REQUEST

Due to their porous nature, many natural surfaces are ideal acoustic products. During special production processes, Organoid® acoustic products are specially coated and transformed into finished acoustic modules with exactly defined effects. These optimised effects drastically reduce the need for absorptive surface area in a room.
