

NEW ADDITIONS 2012

- New, real metal surfaces in gold, aluminium, copper, bronze and graphite colourations give an exclusive touch and authenticity to any environment.
- Unique and innovative Plex texture illuminates the beauty and radiance of natural metals, from traditional cool to new warm tones.
- Expanded colour range of classic Brushed finish, including on-trend brown and warm silver.
- The rich tones and intriguing surface relief of Korten evoke the look and feel of one of the favourite materials in modern architecture.

DecoMetal® high pressure laminate is created using real metal foils* over a laminate core to create stunning metallic laminates that are durable but very light compared to sheet metal. Textures and patterns are applied to some metallic laminates to create outstanding effects. A complete range of striking colours, patterns and finishes is available. Nominal thickness varies depending upon metallic foil and texture.

DecoMetal laminates meet the requirements of EN438:2005 Grade MTF with IMO/MED and USCG fire requirements approval. Please request specific details.

MTF & VGS grades are recommended for vertical applications.
All DecoMetal laminates are delivered with a protective film.

Grade HPL/EN 438-8 MTF Metal, Flame retardant, Thin high pressure decorative laminate.
Grade HPL/EN 438-3 VGS Vertical, general purpose, standard grade.

*M5316 Korten features a melamine surface incorporating iron particles. Some magnetic effect may be evident. Sparks can be emitted during processing.

M5316 Korten is a hand-made design and each individual sheet is unique. Variations between sheets are characteristic of the design and manufacturing process.
